<i>Preface</i>	<i>page</i> ix
<i>Acknowledgments</i>	xvi
1 Succinct overview	1
Part I Polaron Formation	7
2 Electron–phonon interactions	9
2.1 Long-range electron–phonon interaction	9
2.2 Short-range electron–phonon interactions	11
3 Weak-coupling polarons: carrier-induced softening	13
3.1 Long-range electron–phonon interaction	13
3.2 Short-range electron–phonon interactions	14
3.3 Two-site model: origin of carrier-induced softening	15
4 Strong coupling: self-trapping	21
4.1 Adiabatic formalism	21
4.2 Self-trapping	23
4.3 Scaling approach: large- and small-polaron formation	29
4.4 Self-trapping beyond the adiabatic limit	33
4.5 Disorder-assisted small-polaron formation	39
4.6 Synopsis	41
5 Dopant- and defect-related small polarons	43
5.1 Small polarons bound to dopants and defects	43
5.2 Small-polaronic impurity conduction	45
6 Molecular polarons	49
6.1 General features	49
6.2 Examples	52

7	Bipolarons	54
7.1	Large-bipolaron formation	55
7.2	Small-bipolarons: negative- U centers	58
7.3	Softening bipolarons	59
8	Magnetic polarons and colossal magnetoresistance	65
8.1	Magnetic polarons	66
8.2	Donor-state collapse in ferromagnets: colossal magnetoresistance	68
Part II Polaron Properties		73
9	Optical properties	75
9.1	Absorption from exciting polarons' self-trapped carriers	75
9.2	Low-frequency absorption from polaron motion	78
9.3	Carriers' photo-generation, recombination and luminescence	81
10	Large-polaron transport	86
10.1	Coherent versus incoherent transport	86
10.2	Large-polaron effective mass	88
10.3	Large-polaron scattering	91
11	Small-polaron transport	95
11.1	Loss of coherence and hopping transport	95
11.2	Two complementary types of hopping transport	96
11.3	Overview of polaron hopping	98
11.4	Non-adiabatic polaron jump rate	102
11.5	Semiclassical treatment of the non-adiabatic polaron jump rate	108
11.6	Semiclassical treatment of the adiabatic polaron jump rate	110
11.7	Vibrational relaxation and correlations between polaron jumps	118
11.8	Pair-breaking in semiclassical singlet-bipolaron hopping	121
11.9	Exchange interactions and polaron hopping in magnetic semiconductors	123
12	Polarons' Seebeck coefficients	125
12.1	Definitions and general concepts	125
12.2	Hopping polarons' Seebeck coefficients	127
12.3	Softening (bi)polarons' Seebeck coefficients	129
12.4	Seebeck coefficients of polarons in magnetic semiconductors	133
13	Polarons' Hall effect	135
13.1	Coherent transport's Hall mobility	136
13.2	Microscopic treatment of electric and magnetic fields	138
13.3	Hall mobility for non-adiabatic polaron hopping	140
13.4	Hall mobility for adiabatic polaron hopping	147
13.5	Hall-effect signs for hopping conduction	155

Part III Extending Polaron Concepts	161
14 Superconductivity of large bipolarons	163
14.1 Interactions between large bipolarons	164
14.2 Condensation to a large-bipolaronic liquid	165
14.3 Superconductivity and excitations of a large-bipolaronic liquid	167
14.4 Distinctive properties of a large-bipolaronic superconductor	168
15 Non-Ohmic hopping conduction and electronic switching	173
15.1 Formalism for steady-state hopping	173
15.2 Low-temperature hopping in a disordered medium	175
15.3 Interfacial small-polaron accretion: a threshold switching mechanism	180
16 Electronically stimulated desorption of atoms from surfaces	186
16.1 Model Hamiltonian	187
16.2 Scaling analysis	189
17 Hopping of light atoms	191
17.1 High-temperature diffusion: excited coincidences and non-Condon transfers	191
17.2 Isotope dependences of light-atoms' high-temperature diffusion constants	193
17.3 Isotope dependences of light-atoms' low temperature diffusion constants	196
